Printing Studio Suite

Color Reduction and Cleaning Pro

Several color reduction techniques can be applied, depending on the design type, and the real time preview window assures that you'll achieve the result that you want, in the least amount of time. Following color reduction, a full compliment of cleaning tools can be accessed to remove unwanted imperfections. As most of the cleaning tools can be applied automatically, the user will spend a minimal amount of time manually replacing stray dirt, fabric textures or pencil lines

Design and Repeat Pro

Design and Repeat Pro is one of the core modules of the Printing Studio suite and is easily the most advanced and widely used solution currently available. With its' signature option for multiple view operation, no other program lets you see more of the design more of the time. In addition to the design capabilities, Design and Repeat Pro offers a full compliment of engraving tools for the most accurate preparation of manufacturing-ready digital files.

Easy Coloring Pro

Easy Coloring Pro allows designers and color industry experts alike the ability to quickly recolor prints, wovens, knits and wallcoverings. The software automatically matches the desired color standard on virtually any output device. Design coloration and color research can be applied to files originating from any other NedGraphics' software, as well as most other graphic packages. Easy Coloring Pro offers one of the most advanced color calibration engines available today, ensuring color fidelity from monitor, to printer, to final product.

Easy Knit

Easy Knit provides all of the tools that you need in order to design knit fabrics for sweaters, scarves, golf shirts, socks, sportswear and the latest knit trends. Designers can start from scratch and with no prerequisite knowledge of knitted fabric structures. Easy Knit offers design wizards that will allow you to interpret any graphic file into a knit fabrication of any density and quality. Once the design is completed, access our exclusive visual library to find all the stitch types necessary to create realistic knit simulations.

Easy Weave

Create quickly beautiful apparel and home furnishings fabrics. No technical weaving knowledge is needed to express all of your ideas and create stripes, plaids and even more sophisticated dobby patterns. Users can select from the weave library that is included for common weave types such as, twill, plain weave, satin, oxford, and herringbone. Custom weave patterns may also be entered from scratch, eventually combining several different weaves in the same design. Yarns of various shades and sizes can be selected to create the warp and weft color arrangements.

Storyboard and Cataloging Pro

Storyboard and Cataloging is a sophisticated and unique apparel and textile design application for the creation of presentations, storyboards, line sheets, product collections, inspiration boards, color trend sheets, and catalog pages. It is an invaluable tool for apparel designers who need to present fabric designs, garment sketches, and color standards with all related merchandising content. Just about any type of graphic file can be accessed through the use of dedicated file browsers and the content manipulated with simple drag and drop positioning, with no limitations on layering, ordering and grouping.

Easy Map

Easy Map Creator Pro will allow you to process existing product photographs so that different design and color options can be realistically presented. The new product renderings can be printed or shared as digital files, to provide impressive content for presentation boards, product catalogs, advertising, packaging and websites.

The NedGraphics Partnership Advantage

- Over 25 years experience in retail, apparel, home furnishings, textiles, wallcoverings and floorcoverings
- Solutions are fine-tuned and focused with dedication to our customer's needs
- Continuously growing market share with new customers added weekly
- Proven software solutions, used by thousands of satisfied customers
- Corporate stability ensures long-term relationships
- Migration strategies to consistently replace competitive offerings
- Unequaled staff of industry experts who understand your business
- Large portion of revenue invested back in to research and development
- Global responsiveness with several main offices and vast distributor network
- NedGraphics is a subsidiary of NedSense Enterprises NV. NedSense is listed on the NYSE Euronext Amsterdam Exchange.

NedGraphics is compatible with:

Customer Support and Upgrades

- Help-desk response provides phone and e-mail software support worldwide
- Call resolution and tracking software ensures quality control
- Toll free calling in many areas
- Software updates released every year
- New versions exhibit cutting-edge innovations
- Customer wish lists and suggestions fuel upgrade strategies
- Newsletters, success stories and website keeps customers informed
- User Groups, Webinars and trade shows offer frequent global interaction with customers

NedGraphics Software Advantages

- Single, or optionally enhanced, dual monitor working environment
- Interactive status information bars and icon roll-over tool tips
- Microsoft® Windows XP and Windows 7
- MAC compatible as well
- Standard drivers for all peripherals
- OLE (Object Linking and Embedding)
- On-line help and user manuals
- Standard installation procedures
- Multiple undo and redo functionality
- Import and Export all standard file formats
- Drag and drop available for many functions
- Open and work on multiple files at the same time
- Open and work with multiple zoom levels, interactively
- Advanced color calibration with Delta and ICC standards supported
- Access unified color palettes and custom color atlases
- Work with Pantone Colors and Xrite color management peripherals
